- Link with WISHH
- Infant flour production.

AGRICULTURE DÉVELOPPEMENT

Company presentation:

AGRICULTURE DÉVELOPPEMENT

■ Six units:

- 03 units producing respectively wheat flour (75 tons per day), corn flour (25 tons per day) and millet flour (15 tons per day);
- 01 cattle – poultry feed unit (3 tons per hour);
- 01 oil mill plant (10 tons per day) with expeller which is able to crush groundnut, sunflower and cotton seeds;
- And an incubator (4500 chicks per week)

AGRICULTURE DÉVELOPPEMENT

- Corn flour (16 tons per day) and millet flour (09 tons per day) have started working.
- Wheat flour and cattle feed next month
- These flours are sold mainly to bakers and biscuit processors

AGRICULTURE DÉVELOPPEMENT

Link with WISHH:

- Consignee of a container of soy products
- Secure the distribution of soy products samples (defatted soy flour, textured soy protein ...)
- Evaluate the using of soy products by the companies which get these samples

AGRICULTURE DÉVELOPPEMENT

Project: “Infant flour production”

Complete food with different components which are available in the area.

Methods:

- Economical survey
- Technical study
 - formulation with nutritionist
 - experiment in small quantities
 - identify the equipments (extruder, blender, grinder...)
 - operating account
 - production test

AGRICULTURE DÉVELOPPEMENT
