

REQUEST FOR PROPOSAL FROM THE WORLD INITIATIVE FOR SOY IN HUMAN HEALTH (WISHH)

I. DATE

February 10, 2023

II. PROJECT OBJECTIVE

The goal of this project is to identify the barriers to growth facing Ghanaian poultry producers, identify solutions to those issues, inform new practices, and develop a poultry sector assessment tool to identify and prioritize intervention areas in Ghana and other markets. These criteria will be used to assess the current state of the country specific poultry sector and inform new interventions needed to grow the sector with the long-term goal of establishing new customers for U.S. soy. WISHH will leverage connections with the public and private sectors to support the success of this project.

III. ORGANIZATION BACKGROUND

The American Soybean Association (ASA) was founded in 1920 by soybean farmers and extension workers to promote soy for high protein applications in developmental settings. Overseas activities initiated in the mid-1950s, and to date ASA has worked in over 80 countries. The World Initiative for Soy in Human Health (WISHH) was founded in 2000 to expand the work of the American Soybean Association (ASA) in developing emerging markets to improve health, nutrition and food security, building the groundwork for future markets of soy. WISHH provides services in food technology, business development, nutrition services, and program and proposal development. WISHH expertise extends its network into additional areas, such as aquaculture and animal feed.

ASA/WISHH connects trade and development to strengthen agricultural value chains in emerging markets, creating trade and long-term demand for U.S. soy. Trade can improve lives worldwide for both farmers and consumers. U.S. soy trade in emerging markets is pivotal to improve accessibility, affordability, and acceptability of high-quality plant and animal-sourced proteins in developing economies. Rising incomes in emerging economies generate further opportunity for trade. ASA/WISHH builds opportunity for long-term trade by improving agricultural value chains, human and animal nutrition, and farmer net incomes. ASA/WISHH initiatives broadly fit in two arenas: (1) trade-building long-term, early-stage market

development, and, (2) trade-building international agriculture and economic development. The St. Louis-based Program operates in sub-Saharan Africa, Asia and Central America.

ASA/WISHH offers over six years of proven feed sector capacity and decades of accumulated knowledge from ASA programs. Principal approaches include market and economic assessments, technical assistance and capacity building, food and feed trials and demonstrations, farmer field days, youth mentorship programs, food and feed value chain development, and market linkages.

ASA/WISHH achieves its mission by working in close partnership with: (1) the public sector (e.g., USDA, USAID, U.S. land grant universities, and host country governments), (2) the private sector (e.g., trade associations: Qualified State Soybean Boards and U.S. Soybean Export Council), and (3) private voluntary organizations. The Program draws upon the resources and experience of these partners and the services of a cadre of ASA/WISHH consultants with technical expertise in agricultural, international and commercial development spheres. ASA/WISHH relies on decades of experience in food commercial development and agricultural development programming. The Program takes pride in its growing portfolio of success with U.S. government-funded projects, including USDA (Food for Progress, McGovern-Dole, Global Broad-Based Initiative, Foreign Market Development, Market Access Program, Emerging Markets Program, and Quality Samples Program) and USAID funding in both prime and sub-recipient capacities. ASA/WISHH has also attracted both private sector and other complementary funding sources from various donors to build on and leverage core funding from Qualified State Soybean Boards.

WISHH's objective is to increase the international consumption of soy protein in the human, livestock, and aquaculture sectors in new markets and thereby create new opportunities for soybeans and providing higher economic returns to U.S. soybean producers.

IV. SCOPE OF WORK

This project has three primary components. Parts one and two are strongly related and should be completed together. Part three may be considered a standalone activity. Bidders may submit proposals for all three activities, or separately (one and two or three). Below is a description of each of the components.

1. The purpose of this activity is to identify the challenges facing smallholder poultry farmers and use that information to develop a strategy to transition smallholder farmers into medium scale farmers. A study will be conducted on the Ghanaian poultry industry which will include an overview of the current industry and a more detailed analysis into the challenges facing small scale poultry farmers and constraints preventing them from growing their businesses to medium scale. The consultant is expected to provide thorough justification to support answers to each of the questions:
 - a. How should small and medium scale producers be defined?
 - b. Should the focus be on layers, brooders, or broilers?
 - c. What is the financing requirement for small scale farmers?
 - d. What are the limitations to accessing financing for small scale famers?

- e. Feasibility of transitioning small scale farmers to medium scale.
 - f. How can progress be measured?
 - g. What is the proposed timeline for achieving measurable results?
 - h. What are the main strategies needed to successfully make the transition?
 - i. What are the primary issues related to feed?
 - j. What are the primary issues related to training?
 - k. What are the primary issues related to market access?
2. Based on the information gathered in the study, recommendations will be made, and a strategy will be developed for farmers to make measurable steps towards scaling their production. The tactics should be proven and replicable. Additionally, partner organizations will be identified to create an ecosystem of growth for African poultry.
 3. A guide will be created to assess the poultry industry in developing and emerging markets, determine the sector's level of market maturity, and identify intervention opportunities.

The proposal should outline the methodology for each of the activities. This project should include in country data collection as well as desk research. Please include a list of project partners/sub-contractors that are expected to participate in the project.

Project Deliverables:

1. Three separate reports for each of the outlined activities
2. Works cited
3. Trip reports for all travel
4. A list of companies and individuals that contributed information and their contact information for follow-up
5. Surveys, questionnaires, and other data collection tools as well as the responses
