

MEAGAN KAISER

Meagan Kaiser is the United Soybean Board immediate past chair as well as a soil scientist and soybean grower from Bowling Green, Missouri. She previously served as USB Strategic Plan Task Force Chair and oversaw a nearly 20-member committee that created the current strategic plan that prioritizes sustainable soy solutions for global and domestic customers while ensuring value and profitability for U.S. soybean farmers. She has served as the executive director of the largest stakeholder organization for flood control in the Upper Mississippi Valley.

Meagan also serves as Chief Operating Officer and soil scientist at the innovative business, Perry Ag Lab, Inc., founded by her family. The firm helps agricultural producers of all sizes from

throughout the world produce a more efficient and economic yield through the balance of nutrients necessary to grow plants and animals. To accomplish this goal, their laboratory tests soils, plant tissues, fertilizers, manures, water, and feeds.
